

GREEN TIP OF THE MONTH

Plastic Bag Recycling

Plastic Bag Recycling Do's and Don'ts

Plastic bags and other clean, dry plastic film can **ONLY** be recycled through a special program called ReStore. ReStore bins can be found in most large retail establishments! For a complete list of acceptable plastic films go to rirrc.org.

Plastic bags should **NEVER** be placed in with your recyclables, curbside or at the Transfer Station! No plastic bags, bags of bags, or recycling inside of bags! Plastic bags are not biodegradable, they litter the environment and contaminate recyclables at RIRRC's Material Recycling Facility.

For a greener environment use alternatives to plastic whenever and wherever possible. Choose eco-friendly or reusable totes for all shopping trips! Keep them with you!
